Discover the mobile turnstile on base plate

Combine security with flexibility with this mobile turnstile on baseplate. The perfect solution for temporary access control at locations such as construction sites, festivals and vacant properties.

Key features

- **Easy installation**
This solution comes complete and can be easily moved using lifting eyes and forklift channels.
- **Additional security**
Optionally, the turnstile can be equipped with a rotating spike comb to prevent climbing.
- **Durable design**
Fully galvanized to resist corrosion, ideal for both indoor and outdoor use.
- **Compatibility**
Easily integrates with various access control systems.
