beyond **technology.**

The horizontal, bidirectional movement of the arm allows patrons to pass smoothly through the turnstile.

The Catrax Clip column has rounded corners and plenty of internal space. As access is gained by a key lock, there are no exposed screws.

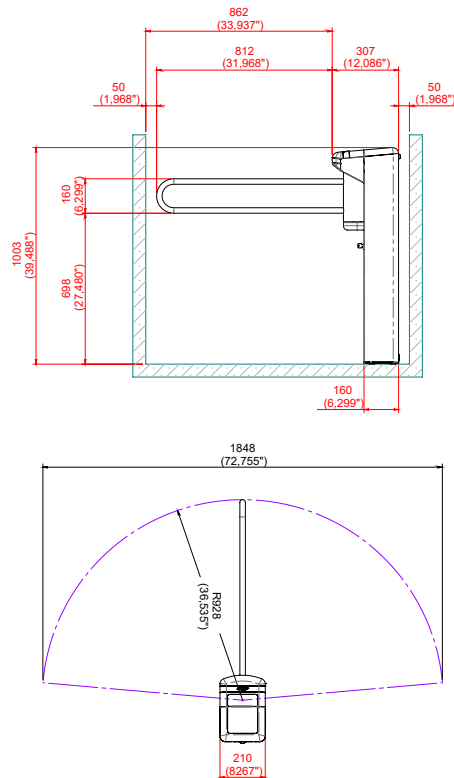

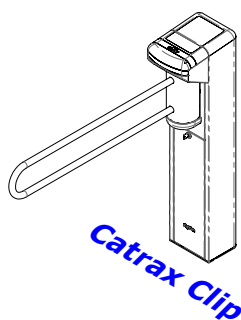

The top panel of Catrax Clip is manufactured in high impact engineering plastic and is available in black, Bordeaux red and green (special colors can be optionally supplied). On top of that, the stainless steel cover can be customized with the customer's own brand identity.

The double-bearing structure prolongs equipment life and guarantees excellent performance.

Catrax Clip can be configured with pictograms to inform access permission.

Catrax Clip comes with a U-shaped mounting drawer that can be easily removed or replaced on the front part of the column, by means of a key lock.
